

KS12

KING STARTER 12-5-14-8 + TE

Product Description:

King Starter 12.5.14.8 + TE is a NPK compound produced using the latest compound fertiliser equipment technology to enable end user confidence of even nutrient application.

This NPK granule has consistent sizing between 1.75-2.5mm and is a fully compounded granule with equal nutrient content in every granule.

The NPK granule is designed for direct drilling or broadcast application methods

King starter 12.5.14.8 + TE nitrogen and potassium type and sources enables quick nutrient plant uptake and crop response. Suitable for application with direct drill equipment at planting or broadcast application.

This specialized NPK compound has the ideal nutrient content for starter fertiliser plantings across most cropping systems that require this even balanced NPK ratio. Crops include all horticulture, broad acre, tree, pastures cropping systems and can include home garden, lawns and ornamental growing situations

Typical Analysis (minimum)

Nutrient Type	Analysis Values
Total Nitrogen (N)	12%
Nitrate Nitrogen	3%
Ammonium Nitrogen	9%
Available Phosphate (P)	5%
Soluble Potassium (K)	14%
Sulphate Sulphur (S)	8%
Magnesium (Mg)	1.5%
Calcium (Ca)	2%
Boron (B)	0.02%
Zinc (Zn)	0.1%
Iron (Fe)	0.02%
Molybdenum (Mo)	0.02%

Benefits of King Starter 12.5.14.8 + TE

- Providing necessary NPK nutrients to ensure a healthy start to your cropping system or good option for maintaining the needed NPK nutrients for plant growth throughout the growing cycle
- Cost effective option for applying N, P & K nutrients in all situations
- High quality granule, produced with the latest compounding technologies with exact nutrient contents in every granule
- Provides high quality N & K nutrient with quick uptake within the plants

Directions for use

Kingenta recommends you consult an experienced agronomist and conduct a soil test on the desired treated area prior to the application of this specialized NPK compound. Use rates will vary between cropping systems. Application rates between 50-400kg/ha could be required.
